Table 25. Data quality dimensions, metrics and targets

Dimension	Metric	Pilot target
Provenance	Share of documents with complete source, date, checksum and reuse terms	100%
Text accuracy	Character error rate of OCR on a hand-checked sample	Below 3% for indexed pages
Completeness	Share of a defined collection ingested (for example, all Acts in force)	At least 90% of the target collection
Timeliness	Median days from publication to availability in search	Under 7 days for monitored sources
Consistency	Share of records valid against the metadata schema	100%
Uniqueness	Share of duplicate documents detected and merged	Duplicates under 1%
Language parity	Share of documents with both Bangla and English titles where both exist	At least 95%

Pilot targets. The OCR character error rate is measured on a stratified sample of at least 50 pages per corpus release, checked by two people.
