Table 30. Bangla Policy Foundation Model: stage gates

Stage	Entry criteria	Main activities	Outputs	Exit criteria
Stage 0	Governed P0 corpus; benchmark protocol agreed	Evaluate open models with retrieval; error analysis by document type and language	Baselines; BanglaPolicyQA v0; evaluation report	Measured gap to thresholds documented; Stage 1 decision taken
Stage 1	Material gap remains; curated adaptation data; compute allocated; ERRC review	Parameter-efficient adaptation; instruction tuning on curated pairs; red-teaming	Adapted model; model card; benchmark v1 results	Gain over Stage 0 on agreed metrics; all safety thresholds met
Stage 2	Stage 1 gains insufficient for priority tasks; national compute available; cost-benefit case approved	Continued pre-training on governed Bangla text; independent audit	Domain model release; audit report	Independent audit passed; release decision by Steering Board and ERRC
