Table 4. Selected baseline indicators for Bangladesh

Indicator	Reported value	Implication for BAPIL	Source
UN E-Government Development Index (EGDI), 2024	Rank 100 of 193, score 0.6570 (rank 111 in 2022); highest EGDI among least developed countries	Digital service foundations exist to build on	[5, 23]
ITU Global Cybersecurity Index, 2024	Reported in the top tier	Frameworks exist; resilience under stress still needs testing	[24, 25]
Oxford Insights Government AI Readiness Index, 2023	Rank 82	Room to improve on governance, data and capacity pillars	[26, 27]
University AI compute, 2025 estimates	2 to 55 GPUs per surveyed department; public universities at the low end	Use shared national compute; keep pilot models small	[27]
Data protection and data management	Personal Data Protection Act, 2026 and National Data Management Act, 2026 gazetted on 10 April 2026 (Acts No. 63 and 80 of 2026)	Legal context for a public-data-first design; reuse of published documents rests on the Right to Information Act and reuse terms	[8, 9]
National AI policy	Draft 2026-2030 consulted in January 2026; new drafting from Q4 2026	Timely window for technical input	[12, 16]
Network resilience	The nationwide internet shutdown of July 2024 exposed dependence on connectivity and single points of failure	Plan for offline operation, backups and recovery	[25]

Indices measure different things over different years and should not be compared directly. Values are as reported in the cited sources.
