Table 51. Indicative funding mix by horizon

Source	Year 1 (Phase 1)	H1 from Year 2	H2 2029 to 2030	H3 2031 to 2035	H4 2036 to 2041
Government core contribution (MoU, development budget)	70 to 75%	30 to 40%	40 to 50%	45 to 55%	50 to 60%
Competitive research grants	0%	20 to 30%	15 to 25%	10 to 20%	10 to 15%
Development partners (pilot-specific)	25 to 30%	20 to 30%	15 to 20%	5 to 10%	0 to 5%
Service agreements with agencies (cost recovery)	0%	0%	5 to 10%	15 to 25%	20 to 30%
Industry and philanthropy (open benchmarks, fellowships)	0%	5 to 10%	5 to 10%	5 to 10%	5 to 10%

Year 1 relies on sources that can be committed before Month 1: the government budget and one development partner. Research grants and industry funds follow once the lab exists. No single non-government funder should provide more than 30% of the budget in any year, and industry support never buys influence over research results or governance decisions.
