Table 62. Budget by cost type, with low, base and high scenarios (Tk crore)

Item	Year 1	Year 2	Year 3	Total
One-time direct costs (equipment, benchmark creation, studies and evaluations)	1.42	1.46	0.79	3.67
of which capital expenditure (servers, GPUs and storage)	1.14	1.02	0.30	2.46
Recurring direct costs (staff, editors, fellows, hosting, OCR, training, assurance)	2.69	5.05	6.35	14.10
Host overheads and contingency	0.62	0.98	1.07	2.66
Base case total	**4.73**	**7.49**	**8.21**	**20.43**
Low scenario total	4.20	6.58	7.16	17.93
High scenario total	5.76	9.46	10.03	25.25
Adjusted base case: known omissions added and 10% contingency (Section 17.2)	5.29	8.10	8.85	22.24

Low scenario: staff costs 15% lower, escalation 6%, equipment 20% cheaper, Tk 120 per US dollar. High scenario: staff costs 20% higher, escalation 10%, equipment 25% dearer (for example import duty and VAT), Tk 135 per US dollar, contingency 10% and USD 20,000 of cloud compute for Stage 1 adaptation. Adjusted base case: base-case assumptions plus Tk 15 lakh a year for engagement events, P5 survey data, travel and open-access fees, a computer (USD 1,200) for each of 19 new staff, and a 10% contingency. Figures are rounded independently.
