Table 72. Indicative funding by source and stage (Tk crore)

Source	Phase 1 (Year 1)	Phase 2 (Years 2 and 3)	Scale-up (Years 4 to 8)	Total, 8 years
Government core contribution (MoU, development budget)	3.31	6.32	108.15	117.78
Competitive research grants	0.00	3.51	34.10	37.62
Development partners (pilot-specific)	1.42	3.89	18.63	23.94
Service agreements with agencies (cost recovery)	0.00	0.57	40.46	41.03
Industry and philanthropy (open benchmarks, fellowships)	0.00	1.41	17.51	18.91
Total	**4.73**	**15.70**	**218.85**	**239.28**

Each year's budget is split using one indicative share inside each range of Table 51: Year 1 government 70% and development partners 30%, because research grants and industry funds cannot be committed to a lab that does not yet exist; Year 2 (H1) government 35%, grants 25%, development partners 30%, service agreements 0%, industry and philanthropy 10%; Year 3 (H2) 45, 20, 20, 7 and 8%; Years 4 to 8 (H3) 50, 15, 7, 20 and 8%. Sources are categories, not single funders; no single non-government funder provides more than 30% in any year. The scale-up column applies only if the scale-up is approved. None of these amounts has been requested or committed. Computed by blueprint/src/budget_model.py (function funding_by_source).
